

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

MONITORING REQUIREMENTS NOT MET

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water standards meet EPA's health standards. **During December 2008 we did not complete all testing for Total Coliform and therefore cannot be sure of the quality of our drinking water at that time.**

What should I do?

There is nothing you need to do at this time.

What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately.

What Happened? What is being done? Explain below.

Due to the Holiday Schedule, Samples taken on 12-31-08 were not picked up by the lab techs. Therefore the required number of monthly samples were not met.

We anticipate resolving the problem within issue has been Resolved
estimated time frame
